Re: BCMEA Update on COVID-19 Industry Wide Health Directions

With respect to last week's communications, we noticed some inconsistencies in our points regarding COVID-19 Industry Wide Health Directions. First and foremost, we apologize for any confusion or inconvenience this may have caused. Please refer to the below directions with respect to travel outside of Canada and the following additional criteria under which employees need to quarantine or isolate and NOT report to work or Dispatch:

- Employees who have been diagnosed with COVID-19;
- Employees who have symptoms of COVID-19;
- Employees who are living or in an intimate relationship with someone who has COVID-19;
- Employees who are caring for someone who has been diagnosed with COVID-19;
- Employees who have received a recommendation from a Canadian government agency, health authority, or public health official to isolate due to COVID-19 concerns and health directions.

Please review and publicly post the updated COVID-19 Industry Wide Health Directions document for further information: http://www.bcmea.com/wp-content/uploads/2020/03/COVID-19-Health-Directions-March-2020_final.pdf

BCMEA can now confirm that all previous documentation has been updated and is available on our website.

As you know, the situation is evolving quickly and we will continue to get you the most accurate information as it becomes available.

Should you have any further questions, please do not hesitate to reach out to John Beckett, VP, Operations at jbeckett@bcmea.com.
